QwenLM/qwen-code#2838: feat: add bun runtime support

Created April 02 (46d ago) | Updated May 14 (4d stale) | +3434 / -6 in 6 files | Ready | Mergeable: unknown

State: **Changes Addressed, Awaiting Re-review**

CI: PENDING

Commits (2): 084e2b22 feat: add bun runtime support (Apr 02, 2026)

440ecd26 fix: address PR review comments - make Bun opt-in via QWEN_RUNTIME env var, rege (May 14, 2026)

Reviews (2):

wenshao [CHANGES_REQUESTED] Apr 24, 2026: The added `bun.lock` appears to be generated from stale or incomplete manifests. For example, it records `@lydell/node-pty` packages as `1.1.0` while

Review Comments (17):

wenshao on package.json: **[Critical]** This rolls the root package version back to `0.13.2` while the base branch is already newer. The root ver

wenshao on package.json: **[Critical]** `package.json` changes dependency versions, but `package-lock.json` was not updated. `npm ci` fails with

wenshao on packages/cli/index.ts: **[Critical]** Changing the published CLI shebang to `#!/usr/bin/env bun` makes the installed `qwen` binary require Bun

wenshao on scripts/build.js: **[Critical]** The standard `npm run build` path now unconditionally executes `bun install`, so users and CI environment

wenshao on scripts/start.js: **[Critical]** `npm run start` still launches this wrapper with Node, but the wrapper now immediately shells out to `bun`
