Overview

One change since the last report on May 22: **euxaristia/pcc#10** (linker integration, +1,695 lines) was closed or merged, and **euxaristia/pcc#15** (make C compiler the default, +153/-384 lines) was opened as a replacement. The total count remains at 12 open PRs. 1 PR is in an active review cycle, 2 have been recently updated, 4 are waiting for maintainer attention, 3 are aging, and 2 have gone stale. microsoft/node-pty#901 has crossed the 70-day threshold.

Key Findings

euxaristia/pcc#15 is a new PR opened on May 22, replacing the recently closed pcc#10. This PR makes the C compiler the default in the build system (+153/-384 lines across 4 files). It already has 1 review with 3 review comments, suggesting active maintainer engagement. This is a healthy sign for the pcc project's review velocity.

euxaristia/pcc#10 (builtin linker integration) was closed or merged since the last report. This PR had +1,695 lines across 4 files and was under review with 7 review comments. Its closure and immediate replacement by pcc#15 suggests the linker work may have been superseded by a different approach.

QwenLM/qwen-code#2838 continues to wait for maintainer re-review. It has been 9 days since the author pushed fixes addressing all review feedback (+3,434 lines across 6 files). No maintainer activity since May 14. This is the largest and most actively maintained PR in the portfolio.

microsoft/node-pty#901 has reached 70 days with zero maintainer engagement beyond the initial CLA request. The fix is minimal (+8/-2 lines) but cannot proceed without CLA completion. No reviews, no maintainer comments.

clockworklabs/SpacetimeDB#4773 (42 days) had a maintainer question on April 28 about the PR's goals that remains unanswered. CI is passing. Without a response, this PR is unlikely to advance.

charmbracelet/glow#937 and **euxaristia/tree-sitter#1** continue with zero maintainer engagement at 26 and 38 days respectively. glow#937 is a minimal 3-line fix, while tree-sitter#1 has substantial code (+241 lines).

Detailed PR Analysis

● euxaristia/pcc#15 — feat(build): make C compiler the default

&Active; (recent) · Created May 22, 2026 (0d ago) · +153 / -384 (4 files) · Draft: No · Mergeable: True

CI: pending

■ No activity for 70 days. Consider following up or closing.

Recommended Actions

■ [QwenLM/qwen-code#2838](#)

At 9 days since the author's fix push with no maintainer re-response, a polite follow-up comment is warranted. The author has been highly responsive and the PR is well-structured.

■ [microsoft/node-pty#901](#)

70 days stale. The CLA must be completed before any review can proceed. If the CLA is signed, confirm that in the PR. Otherwise, this may need to be closed and resubmitted.

■ [clockworklabs/SpacetimeDB#4773](#)

Respond to the maintainer's question about the PR's goals. At 42 days old with an unanswered inquiry, this PR risks being forgotten entirely.

■ [charmbracelet/ghow#937](#)

At 26 days with zero engagement on a 3-line fix. A brief comment asking about review timeline would be appropriate.

■ [euxaristia/tree-sitter#1](#)

At 38 days, this substantial PR (+241 lines) has had no maintainer response since the initial review. Consider whether the approach still aligns with the project's direction.
